

COURSE CODE/TITLE:	CPE - 031/ Visualizations and Data Analysis	SECTION:	CPE21S1
DATE PERFORMED:	August 1, 2026	DATE SUBMITTED:	August 1, 2026
NAME:	Carl Andrei D. Torres	INSTRUCTOR:	Engr. Jimlord Quejado

ACTIVITY NO. 3	Hands-On Activity 3 - Explore CopyAI
-----------------------	---

1. PROCEDURE OUTPUT

PART 1

Instructions

Part 1: Explore the CopyAI Website and its Tools

Use a web browser and visit the CopyAI website at <https://www.copy.ai/>. Explore **Use Cases**, **Resources**, and **Weekly Demos**.

Describe the general service offered by the website.

Answer Area

In the CopyAI's automated and creative tools, users can generate marketing copy efficiently by the use of AI. Also, CopyAI was built on top of the world's most advanced AI

Part 1: Explore the CopyAI Website and its Tools

Use a web browser and visit the CopyAI website at <https://www.copy.ai/>. Explore **Use Cases**, **Resources**, and **Weekly Demos**.

Describe the general service offered by the website.

Answer Area

CopyAI was built on top of the world's most advanced AI language model which CopyAI really helps thousands of people efficiently and creatively in terms of marketing.

List six categories of product that people can produce through the service by CopyAI website.

Answer Area

Digital Ad Copy, Social Media Content, Website Copy, Product Descriptions, Blog Post and Articles, and Email Campaigns.

List the steps to create a product on the website.

Answer Area

1. You must select the type of copy
2. You must describe the product you need to create with CopyAI (Insert Product Data)

List the steps to create a product on the website.

Answer Area

- CopyAI (Insert Product Data)
3. You can get your prompted results and edit because it has inline-text editors.

PART 2

Part 2: Explore Access Options and Pricing Information

Click **Pricing** on the website.

List access options and the cost associated with each option.

Answer Area

1. Self Serve Option which costs around \$29/month
2. Enterprise Plan for Customized Billing only

List the features provided for each option.

Click **Show Answer** to see a couple of examples.

Free Plan	Pro	Enterprise
Answer Area 10 Credits per Month	Answer Area Unlimited Credits	Answer Area Unlimited Users
Answer Area 100 Bonus Credits for the first month	Answer Area Unlimited Words	Answer Area API Access
Answer Area 25+ languages to choose from	Answer Area 5 User Seats	Answer Area Bulk Workflow Runs
Answer Area 90+ copywriting tools that you can use	Answer Area Unlimited Projects	Answer Area <u>CRM</u> & SEP Integrations
Answer Area 2000 words per month	Answer Area Multi-LLM Switcher (GPT-4, Claude, and Gemini)	Answer Area Unlimited Custom Workflows
Answer Area 1 user seat only	Answer Area Custom Brand Voices	Answer Area Guided <u>Jumpstart</u> Implementation
Answer Area Essential LLM Access	Answer Area Infobase Storage	Answer Area Designated Success Team
Answer Area No Credit Card Required	Answer Area Real-Time Search	Answer Area Enterprise Security

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

AI for Oceans

1

I finished!

What is Machine Learning?
CodeAI

HOW AI
WORKS

MACHINE
LEARNING

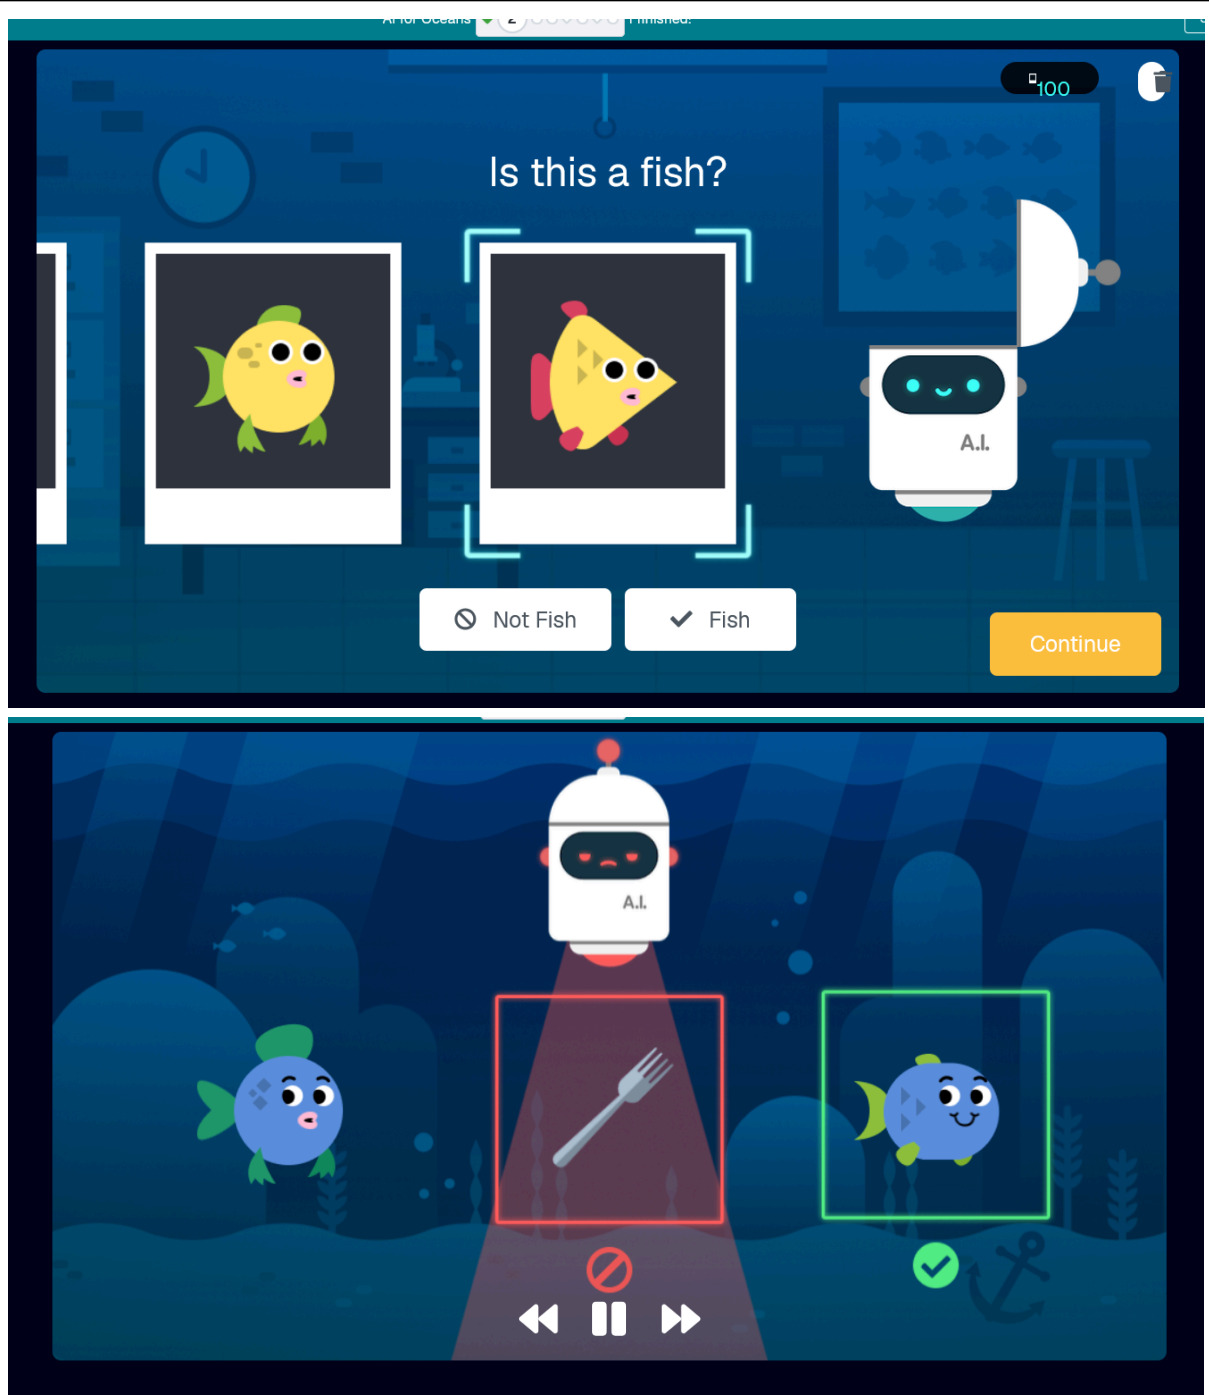

C O

D E

Watch on YouTube

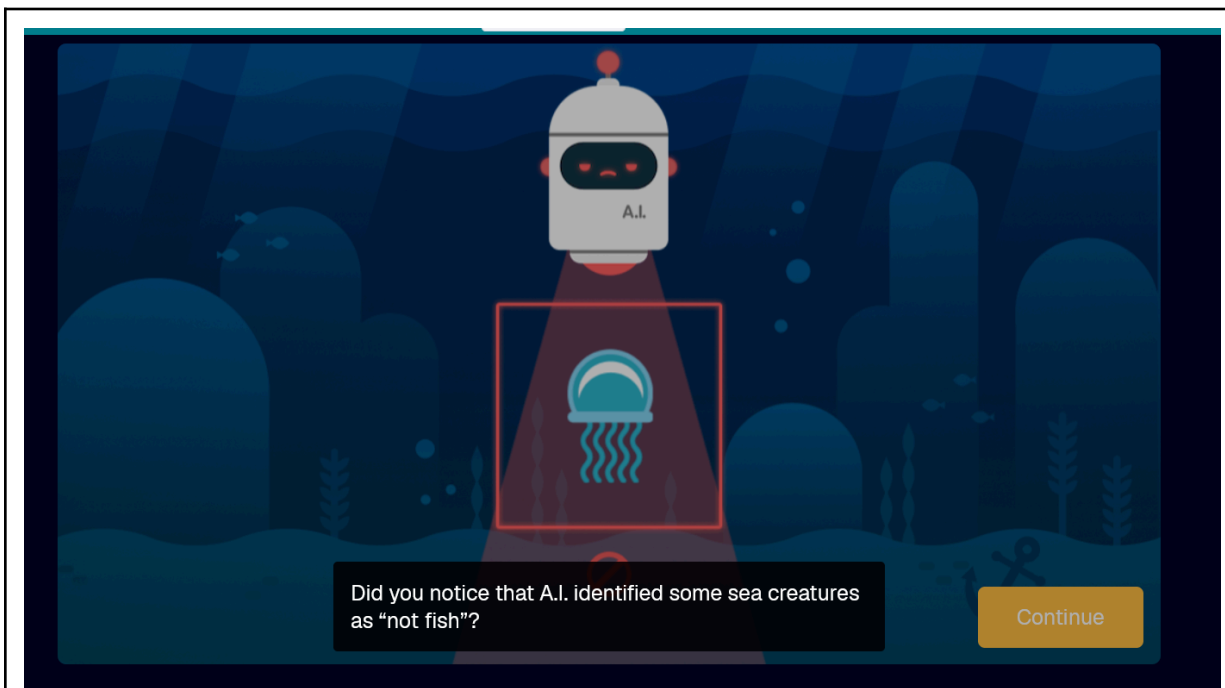

In this video, I've learned that Machine Learning is a type of A.I which is used in our everyday lives which sometimes solves the biggest challenges in your life. Machine Learning is how the computers recognize the patterns and make decisions without explicitly programmed by the programmer. Machine Learning is so easy to manipulate because it is just "Trial and Error" and it needs experience which the experience is lots and lots of data which has any kind of data types which it verifies if the input of the user is correct based on the data that being stored and trained in the machine.

STEP 2

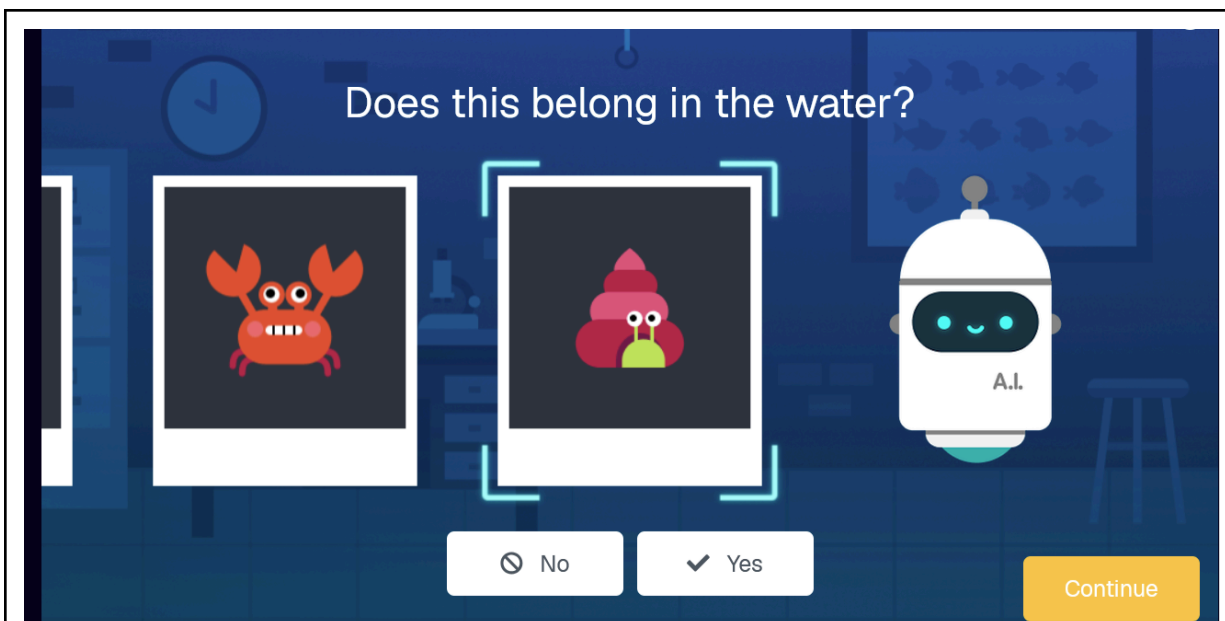

In this part, you must first train the machine if the data was a fish and it needs at least 50 right datapoints so that you can train the machine how to validate the given data based on the stored datapoints inside it.

STEP 3

In this part, you need to train the machine to notice the other aquatic creature and validate it after.

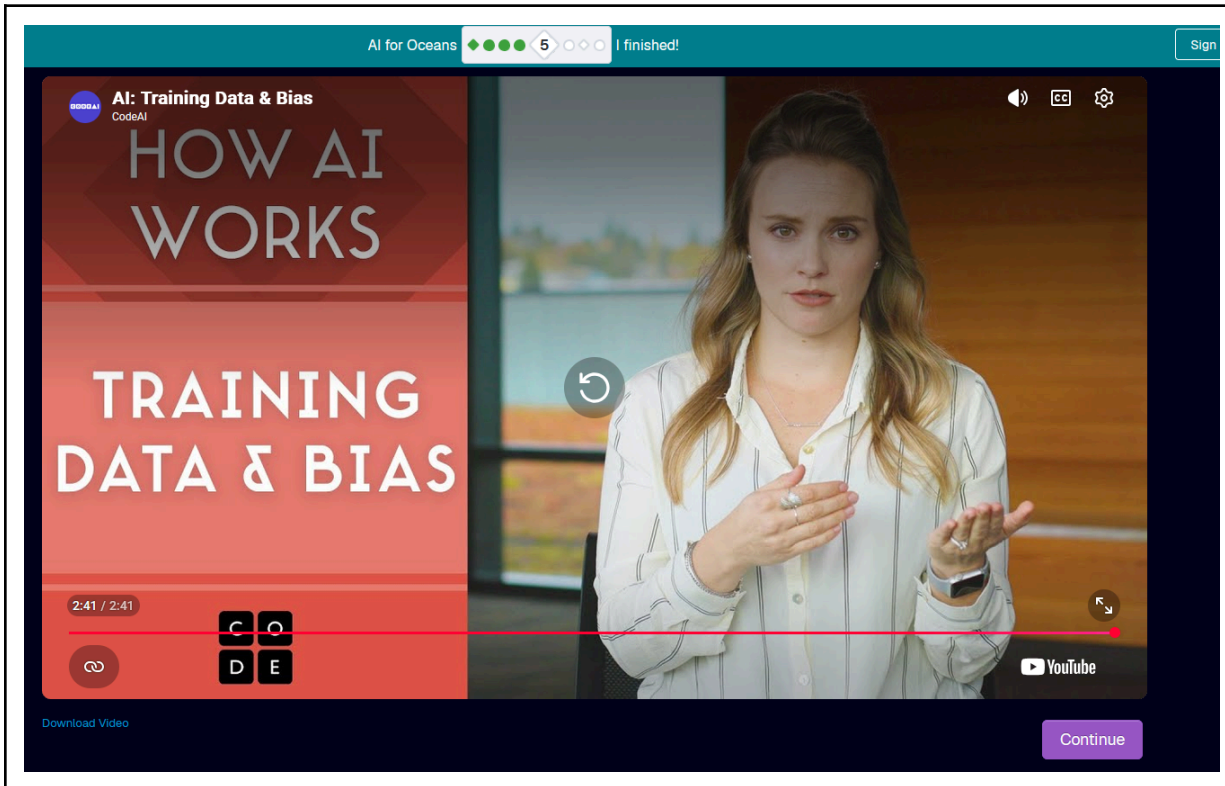

STEP 4

In this part, you need to train the machine if the data belongs in the water or not which gives the aquatic

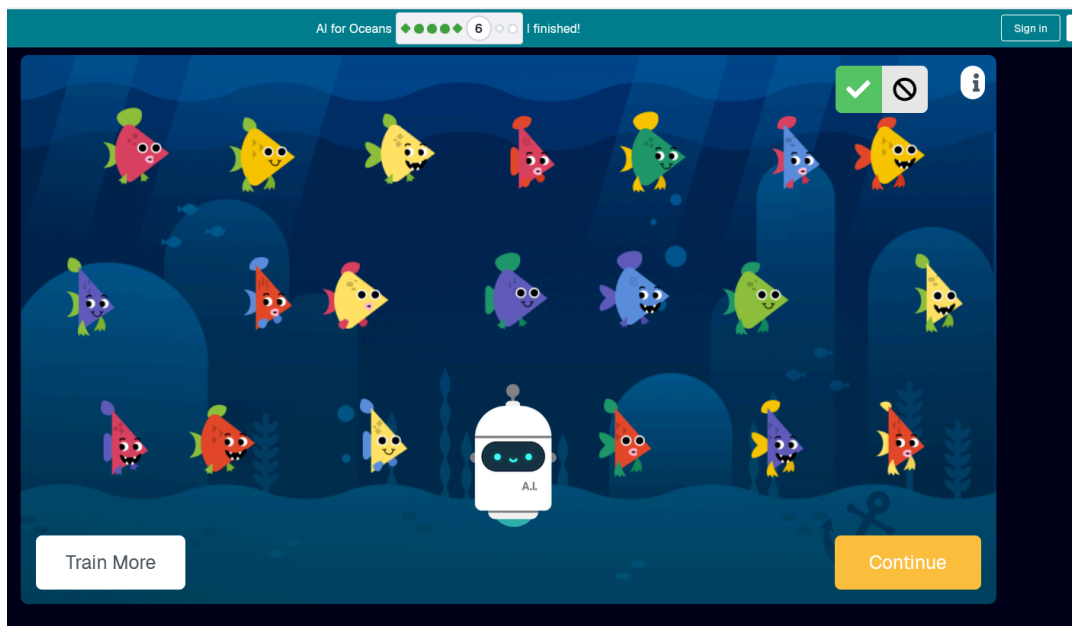

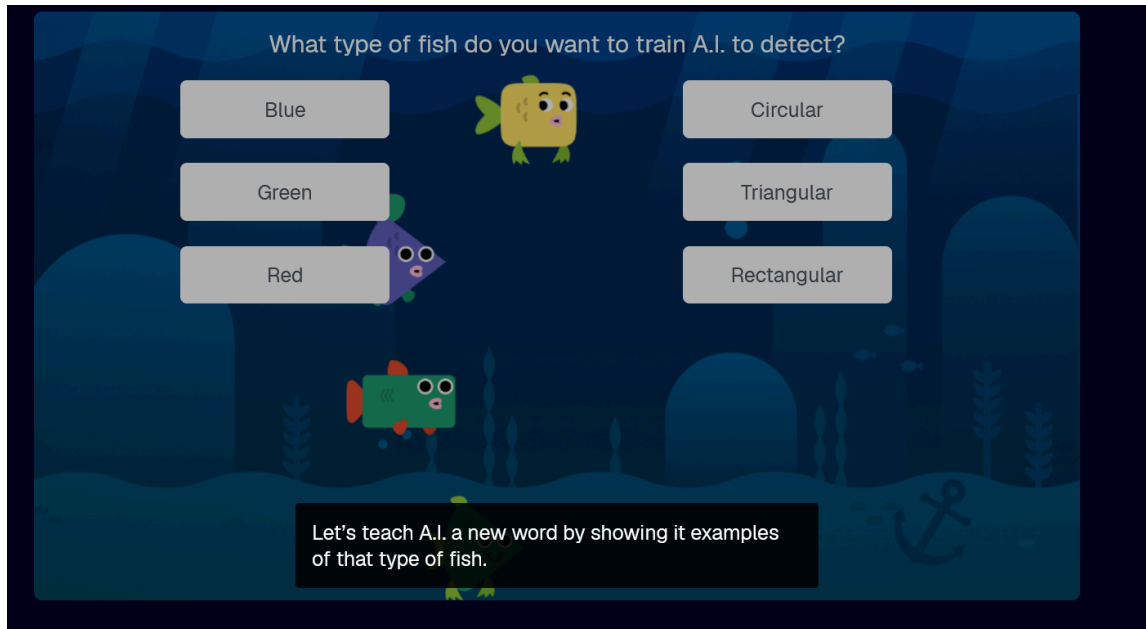

creates a right data points.

STEP 5

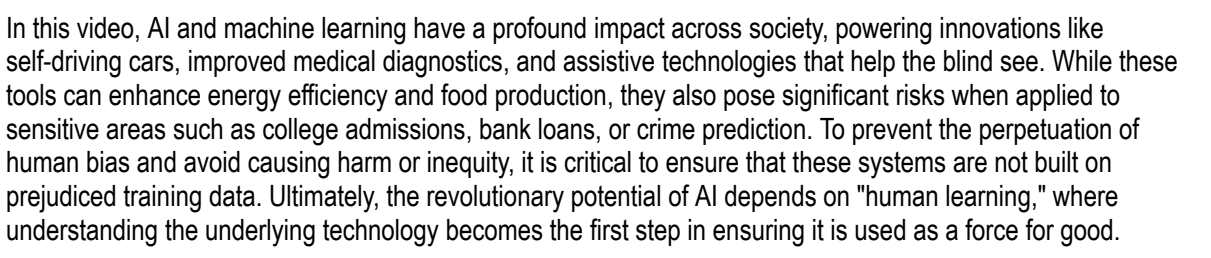

In this video, the effectiveness of machine learning is fundamentally tied to the quality and quantity of training data, which is collected through both passive tracking of user behavior and active human participation. While this data powers innovations in recommendation services and medical diagnostics, incomplete datasets such as medical images taken only from men which result in "bias" that favors certain groups while excluding or de-prioritizing others. Because human bias can be inadvertently included during data collection, developers must ensure that training sets are sufficiently large and representative of all possible scenarios and users. Ultimately, since training data acts as the "code" that programs the algorithm, providing diverse and unbiased data is the crucial responsibility of the human trainer to ensure the computer learns correctly.

STEP 6

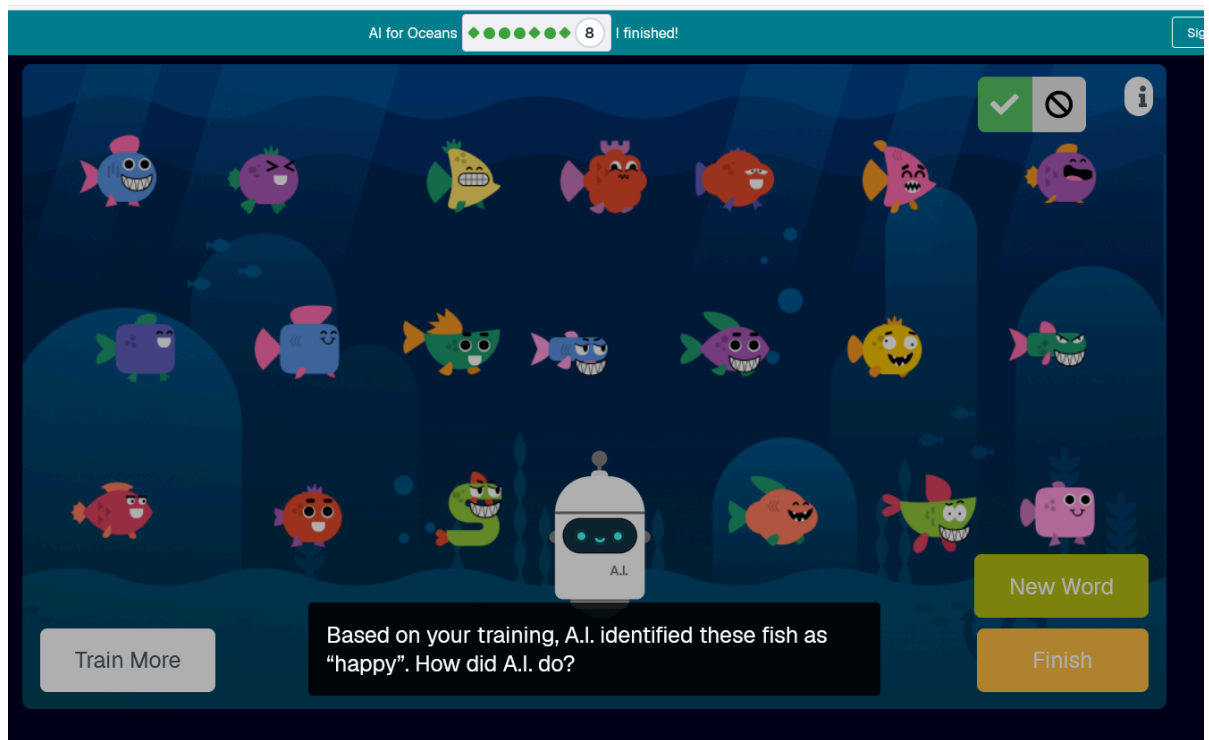

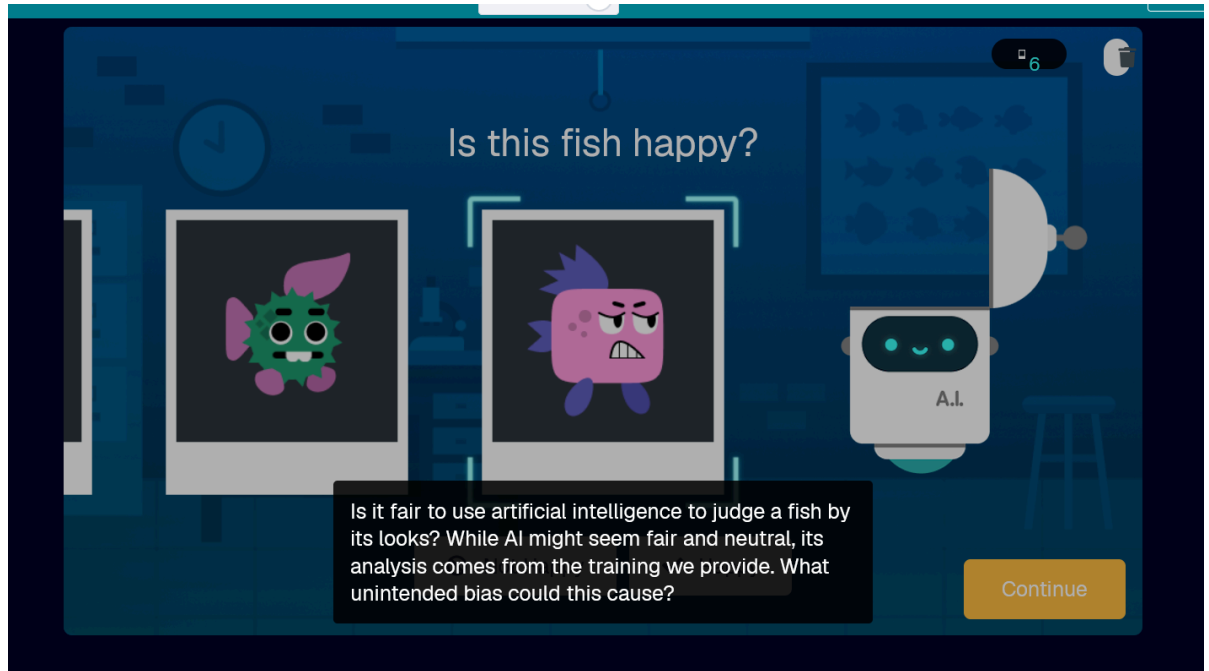

In this part, I've trained the machine if the fish is triangular and it verifies the given data if it is triangular.

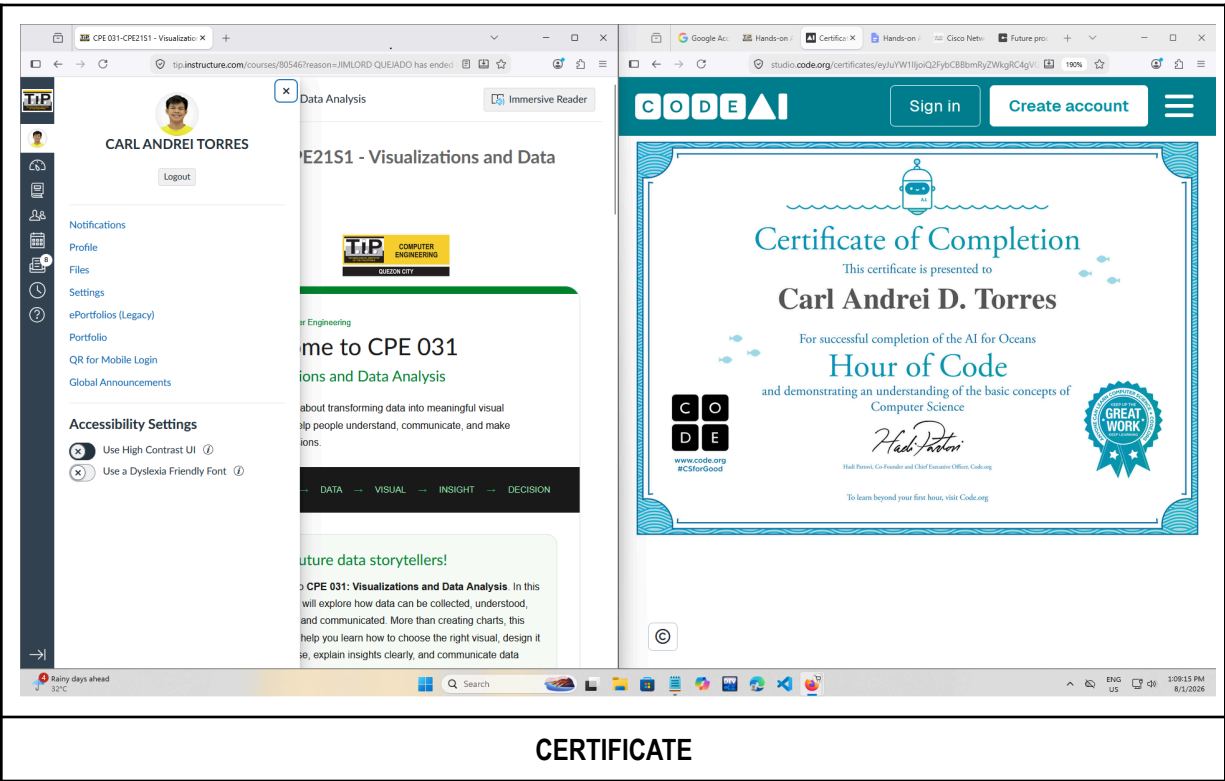

STEP 7

STEP 8

In this part, I've trained the machine if the fish is Happy and it verifies the data.

Conclusion	I've learned that Machine Learning really needs to train more data points to verify the given data with its perfect and efficient accuracy.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: NONE

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: NONE

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: NONE

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
