4.1.5 Practice Item - Job Market

🌙 🔍 🗣️ EN ⓘ ✎

4.1.5 Practice Item - Job Market

Getting hired as a data analyst is the first step in your data analytics career.

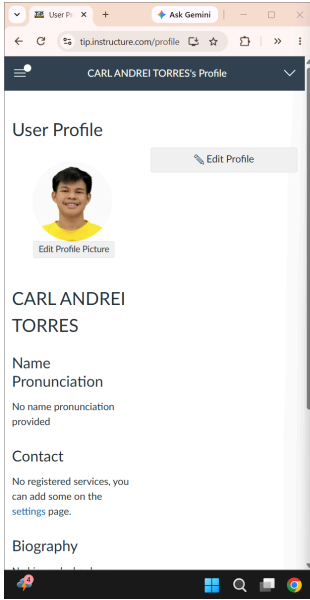

Research career paths in data analytics on internet job sites, such as indeed.com, DataJobs.com, and LinkedIn.com. Then write in the box below one or more paths that fit your interests. After you Submit your answer, you can select Show model answer to review some common data professional career path examples.

I found a Data Engineer (PL/SQL) Hybrid position at Yes Energy in (DataJobs.com), which is an electric power trading analytics software that provides real-time visibility into the massive amounts of data that are generated by the North American electrical grid every day. They need to fill one full-time Data Engineer (PL/SQL) position immediately in Boulder - CO, Chicago - IL, Dedham - MA, or Houston - TX. The Market Data Operations (MDO) Team plays an important role in maintaining the accuracy and reliability of the data. As a Data Engineer, you need to maintain real-time data pipelines and ensure you provide reliable and accurate information to the clients. Also, ensure the highest possible quality and integrity of Yes Energy data, reliability, efficiency, and quality. So their requirements are 4+ years of SQL or equivalent experience and Oracle PL/SQL or equivalent experience. Also, the position details are Full-Time, Reports to Data Operation team Lead, and Minimal travel may be required up to 10 days per year. The Salary Range is \$90,000 - \$120,000, which PHP 5,467,500 - PHP 7,290,000. Yes Energy loves innovation like saying "Yes" to the suggestion of the customers

4.2.2 Practice Item - The Importance of Project Portfolios

4.2.2 Practice Item - The Importance of Project Portfolios

Posting or sharing a portfolio showcasing your data analytics skills and abilities is an essential step in furthering your career as a data professional—research platforms for hosting and sharing your portfolio. Describe the platform that appealed to you most. What seemed most useful about it?

1178 Remaining characters

The platform for sharing and creating my portfolio is GitHub which is the most reliable because it is widely recognized and I've used it to create portfolios in last computer courses from my last sem. GitHub stores raw code fast and efficient for Google Colab, VsCode, and Jupyter Notebooks to sort it in one organized place. GitHub's Software also tracks changes and updates made to the projects over time. GitHub's software is very helpful for Full Code Transparency which proves that you clearly wrote the prompts and scripts in your own way. GitHub's hosts live notebooks which displays the interactive data cleaning, modeling, and visualizations. GitHub's shows the workflow efficiently and accurately due your contribution graph and accurate commit history to prove your consistent and organized coding workflow. GitHub's Key Features that are useful for creating and managing your project portfolios are Repositories and Commit History. Repositories are very useful for Project Portfolios which provides you to create Digital Project Folders which are like Central Hubs that contains all your code projects. Also, it has organized file structure

In Conclusion, We need to know how a Data Analyst, Data Engineer, and Data Scientist works in the Data Analytics Industry. The Data Analyst analyze the data and creates a graphical representation on it. The Data Engineer creates and maintains large databases and pipelines. The Data Scientist uses mathematical models to the data to give its mathematical logic. The importance of creating and sharing a project portfolio are organizing your code projects and shows an interactive feature to provide error handling to some code projects in your project portfolio. Data Analytics is very important mostly to Machine Learning because you need to analyze every data before you input or ingest it to the machine itself to the desired operations

CONCLUSION

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: NONE

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: NONE

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: NONE

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
